

Open Source Software and Implications for  
International Copyright Law and Moral Rights in Software

by James Miller\*

INTRODUCTION	1
I BACKGROUND	3
A Source Code	3
1 Software Source Code as Means of Production	4
2 Software Source Code as Artistic Expression	5
B Open Source	5
1 Social Movement	6
2 Legal Movement	7
3 Development Process and Business Model	9
4 International Scope of Authors' Contributions	9
II LEGAL PROTECTIONS OF SOFTWARE	10
A Framework of International Copyright Protection for Computer Software	12
1 Protecting Computer Software Under Intellectual Property Laws - Why Copyright	12
2 Computer Software Protections Under International Copyright - The Current Law	13
B Economic Rights for Software Protection	16
1 International Copyright Dominant View is Economic	17
2 Open Source Rights under Enumerated Economic Rights	18
3 At the Intersection of Contract and Copyright	19
a Right of Attribution under Economic Protection	19
b Right of Adaptation under Economic Rights	21
c Open Source Software Licenses Are Non-Exclusive Licenses or "Shrink-wrap" Contract	22
d Copyleft Licenses Assert Compulsory Distribution for Derivative Works	24
C Moral Rights Protections - The Need for Complementary Moral and Economic Rights for Open Source Software	27
1 International Obligations to Protect Moral Rights in Software	30
2 Application of Moral Rights in Derivative Software	31
3 Limitations in Applying Moral Rights to Open Source Software and Focus on "Authorhood"	35
a Individualism and Open Source Software	35
b Inadequacy of Individualistic "Authorhood" Narrative	35
c Collective Approaches to Open Source Protections	36
d Cultural Sustainability Narrative for Open Source	37
III RECOMMENDATIONS	38
A Choice of Law and Venue License Clauses	39
B Reliance on Copyright Over Contract	40
C Moral Rights Protections For Open Source Code	40
D Incorporation of Protection in	41

	International Agreements	
E	Towards a "New" Theory of Copyright	42
	Collective Narratives	
F	Towards a New Software Enforcement Regime	43
	Source Code as Gatekeeper to Claims of Infringement	
CONCLUSION		44

<sup>i</sup>\*James Miller is a J D candidate at the American Univerity, Washington College of Law Prior to his current academic pursuits, Mr Miller worked as Asia-Pacific Manager and director of Internationalization and Network Engineering at the leading U S embedded controls provider for the aggregate plant industry Mr Miller oversaw a joint-development program between the U S developer and the world's largest plant manufacturer located in Japan and reported to the boards of both companies Mr Miller has worked at startups in the Silicon Valley in internet networking applications and protocol stacks as well as in Japan in similiar mixed engineering and business development capacities His interests in computers began with the purchase of his first computer, an Amiga, in university and where he began investigating through personal "hacking" and university coursework the complexities of localization of multi-byte languages, specifically Japanese
