Grade is hidden in Gradebook....

When I unhide it, it won't stay unhidden. It always goes back to hidden. I have tried all methods for un hiding that I know, clicking the eye, and unchecking the hidden box. Neither will keep it unhidden.

A screenshot of a "Grade item" configuration form. The form contains several fields and options. The "Item name" field is filled with "GRADED - Getting To Know Your Class Quiz Practice". Other fields include "Item info", "ID number", "Grade type" (set to "Value"), "Scale", "Maximum grade" (5), "Minimum grade" (0), "Grade to pass" (0), "Multiplier" (1.0000), and "Offset" (0.0000). There are two dropdown menus: "Grade display type" set to "Default (Real)" and "Overall decimal points" set to "Default (0)". At the bottom, there are checkboxes for "Hidden", "Locked", and "Lock after", and a date selector for "Hidden until" set to 18 February 2009.
