

Mycoursestatus

=====

Mycoursestatus is a course completion report block, developed for student and editing teacher (from v3.9). You can add the block plugin at site/global and course context level.

Site/Global: display attempted courses.

Course: display attempted modules of a course.

Downloadable report as PDF/MS-Word for student and Pie chart for editing teacher.

How it works

=====

- (1) Download the plugin and unpack zip file to [/blocks](#) directory.
- (2) Go to Site administration > Notifications to complete the plugin installation.
- (3) Go to Site administration > Advanced features: Enable completion tracking.
- (4) The plugin is developed based on three conditions of a course:
 - (1) Condition A - module completion
 - (2) Condition B - module with course completion
 - (3) Condition C - course grade completion(Note: Pick condition A/condition B/condition C. Do not pick more than one condition for a course).

(1) Condition A - module completion

=====

A course is completed when all modules satisfy the conditions, where conditional settings are mandatory for each module as:

- (a) Add a new module.
- (b) For resource, go to Activity Completion > Completion tracking: Show activity as complete when conditions are met.
 - > Require view: Student must view this activity to complete it.
- (c) For activity, go to Activity Completion > Completion tracking: Show activity as complete when conditions are met.
 - > Require view: Student must view this activity to complete it.
 - > Require grade: Student must receive a grade to complete this activity.
require minimum score, require status, require passing grade etc.,

(2) Condition B - module with course completion

A course is completed when all modules satisfy the conditions along with course completion conditions, where conditional settings are mandatory for each module and on course completion page as:

- (a) Add a new module.
- (b) For resource, go to Activity Completion > Completion tracking: Show activity as complete when conditions are met.
 - > Require view: Student must view this activity to complete it.
- (c) For activity, go to Activity Completion > Completion tracking: Show activity as complete when conditions are met.
 - > Require view: Student must view this activity to complete it.
 - > Require grade: Student must receive a grade to complete this activity.
 - require minimum score, require status, require passing grade etc.,
- (d) Course Completion > Completion requirements: Course is complete when ALL Conditions are met.
 - > Condition: Activity completion: you could see modules enabled for activity completion, select the one you wish to or select all.

(3) Condition C - course grade completion

A course is completed when minimum course grade is scored without conditional settings. **Just do create modules with content and do not set any condition to module.** The course will calculate the average grade from attempted modules and match with course criteria grade as:

- (a) Create a course with modules.
- (b) go to Course settings > Course Completion > Condition: Course grade > input required course grade.
- (c) Note: When a module is removed after student received course grade, there will not be any update in the block. In that case, backup course, create a new course & add the block.
