1 Create Student-Quiz activity

Create a Student-Quiz activity has no difference to other activities. Go to your course and press on the “**Turn editing on**” button. Choose your topic where you want the new Student-Quiz activity and press “**+ Add an activity or resource**” on the right side.

Figure 1: Add new Student-Quiz activity

Choose Student-Quiz and press “**Add**”. Give a name to the new activity. The Advanced settings is important. You have two options that you can configure.

1.1 Student anonymizer

The first option is Student anonymizer. Students cannot see the author name of questions. Students still see the name for their own questions, and trainers always see the author names.

1.2 Rating and Comment

This option is missing when the Student-Quiz Question-Behavior plugin is not installed. In this case please contact your Moodle administrator to install it. This option adds the rating and commenting behavior to the Quiz. It is recommended to activate this option.

2 Quiz and Questions

In the Quiz and Question view students can edit / delete their own questions only. Trainers can edit / delete all questions.

4 Import / Export

If you want to import to the Student-Quiz activity, please unselect the options “write category to file” and “write context to file” so that the imported questions will be located within your Student-Quiz category.

▼ General

Export category ⓘ Standard für Wi2-FS14

Write category to file Write context to file

Figure 4: Export Question-Bank

If you use the export from Student-Quiz this option is not available to prevent any confusion.

5 Question-Bank

The navigation menu “Question bank” links to the course question bank and shows the questions added in the activity.
